if cancelled within two weeks of RCS.

### Lecturer

#### Susan Daniel, OD

Susan Daniel, OD has been in private practice in Carlsbad, California since 1992. She obtained her Doctor of Optometry degree at the Southern California College of Optometry in 1991. Her practice specializes in visual rehabilitation evaluations and therapy for brain injured and stroke patients, children with special needs, and autism. In 2004, she opened the Sensory Learning Center, which offers a multi-sensory therapy to help integrate auditory, vestibular and visual input. This therapy was instrumental in helping her son

with autism say his first word at 6 years old. Dr. Daniel enjoys sharing her personal experiences of how her vision therapy practice has been enhanced by what she has learned from the multi-disciplinary team of teachers, doctors and therapists who have helped her son, as well as from the non-verbal children and adults with autism she has had the pleasure of working with. She is the proud mother of four children, Rachel (21), Liz (22), Matthew (18) and Elaina (14).

# Autism: Seeing the World from a Different Angle

## Seminar Highlights

- > To learn current therapies and treatments available for children with autism.
- > To learn the new DSM 5 criteria for diagnosing autism.
- > To review the economic aspects of autism.
- > To review the vision research on children with autism.
- > To review the behavioral characteristics of autism.
- > To understand how to prepare and organize your examination and therapy room for a child with autism.
- > To learn how to communicate most effectively with a child with autism.
- > To learn useful strategies for testing and developing visual function of children with autism.
- > To show video cases of examination techniques and vision therapy procedures for children with autism who are non-verbal, have sensory integration difficulties and processing delays.
- > To develop new therapy ideas in a workshop forum.
