

# REGIONAL CLINICAL SEMINAR

## Neuro-Motor Maturity:

OPTIMIZING VISION THERAPY THROUGH TESTING AND INTEGRATION OF REFLEXES

THIS MEETING IS MADE POSSIBLE BY THE FINANCIAL SUPPORT OF THE OEP FOUNDATION AND ITS ASSOCIATES.

Presented by **Alex Andrich, OD, FCOVD**  
**Patti Andrich, MA, OTR/L, COVT, INPP**

Sponsored by the  
Optometric Extension Program Foundation Inc.

**Saturday & Sunday, 7-8 October 2017**

OFFICE OF CHARLES SHIDLOFSKY, OD, PLANO, TX

### Seminar Location

The office of  
Charles Shidlofsky, OD  
7140 Preston Road  
Suite 300  
Plano, TX 75024  
PHONE: 972-312-0177

### Lodging

Springhill Suites Plano/Frisco  
8401 Angels Drive  
Plano, Texas 75024

### Recommended Airport

Dallas Love Field (DLL)  
Dallas/Fort Worth International Airport (DFW)

### Comprehensive 2-Day Seminar

12 Hours Continuing Education

#### **SATURDAY 7 OCTOBER 2017**

9:00am-5:00pm  
(1 hour lunch break)

#### **SUNDAY 8 OCTOBER 2017**

9:00am-3:00pm  
(1 hour lunch break)

Lunch and coffee breaks will be provided

Attendance at this seminar is limited.  
Early registration is recommended.

#### **Cancellation policy**

A non-refundable fee of 25% of registration fees if cancelled within two weeks of RCS.

## Lecturers

### Alexandar Andrich, OD, FCOVD

Alexandar Andrich, OD, FCOVD is a graduate of The Ohio State University College of Optometry. Since 2003, he has been the Clinical Director of The Vision Development Team in North Royalton, Ohio. This office offers comprehensive family vision care specializing in Vision Therapy. He practices with his wife, Patti Andrich, MA, OTR/L, COVT, INPP. Dr. Andrich is a consulting staff member specializing in Neuro-optometric rehabilitation at the Parma Community General Hospital in Parma, Ohio. Dr. Andrich lectures extensively on Sports Vision, Neuro-Optometric Rehabilitation Following Acquired Brain Injury and Vision and Learning.

### Patti Andrich, MA, OTR/L, COVT, INPP

Patti Andrich, MA, OTR/L, COVT, INPP is an occupational therapist known for her success in treating individuals with difficulties in visual-motor, visual-perceptual, auditory perception and vestibular functioning. Patti holds a BS and MA from The Ohio State University. She obtained her Occupational Therapy Certification from Cleveland State University. Patti has done post-graduate coursework at the Institute for Neuro-Physiological Psychology, England UK. Patti works as an occupational therapist and vision therapist at The Vision Development Team. She also lectures extensively on "Neuro-Motor Maturity and the Emergence of Vision: A Look at Primitive Reflexes and Their Role in Visual Sensory Motor Development", INPP Developmental Screening Test Intervention Program for Schools, Sports Vision and Vision and Learning.

Both Dr. Andrich and Patti are involved in their community. They provide services to RealEyes, which provides school-age students an interactive lesson about the science of sight, the health of the eye, and eye safety. They are part of the American Optometric Association's InfantSee and VisionUSA programs. They are members of OEPEF and COVD.

# Neuro-Motor Maturity:

## Optimizing Vision Therapy through Testing and Integration of Reflexes

In day-to-day practice we have all seen the positive effects that good vision therapy has on individuals with oculomotor dysfunction and visual perceptual problems. Further developing our understanding of how vision skills are learned through the maturation of the nervous system is critical to our success in therapy.

This two day, twelve-hour course is designed to provide participants with an opportunity to explore the development of the nervous system. The course focuses on the relationship between the developing sensory and motor systems that lead to the emergence of visual motor and visual perceptual functions.

Hands on assessment techniques, live demonstrations, and video analysis will be used to train participants on medically accepted methods used to assess atypical patterns of movement, evidence of retained primitive reflexes, and delays in the development of postural reflexes.

Participants will also learn techniques to integrate retained primitive reflexes and to stimulate the development of postural reflexes, which build the foundation to the development of optimal oculomotor and visual perceptual skills. The course concludes with practice management strategies for incorporating reflex integration therapy into vision therapy practices.

### Neuro-Motor Maturity

7-8 October 2017

OFFICE OF CHARLES SHIDLOFSKY, OD  
PLANO, TX

OEP reserves the right to cancel seminar two weeks in advance if registration is inadequate.
