Visual attention and visual memory in the normal and neurologically compromised patient: Developmental Optometry's role in Developing and recapturing perceptual and cognitive skills

There is no avoiding the disruption of self in Acquired Brain Injury. There is also interference in the full development of self without developing attention and memory skills. Attention, memory, perception, and cognition constitute who we have been, who we are and what we will be in the future. This course investigates the various aspects of attention and memory: the foundation for perceptual and cognitive development. It is a practical course that covers testing, diagnosis, etiology and treatment.

SUNDAY, March 12, 2017 9:00 am to Noon

What is perception?
 What is attention?
 What are the clinical classifications of attention?
 What are some ways that attention is evaluated?

Therapeutic methods for developing attention and memory

1:00: ADJOURN

See you next year at the Bahia Resort & Hotel

February 25 & 26, 2018

Carl Hillier, O.D., FCOVD

BIOGRAPHY:

Dr. Carl Hillier graduated from Pacific University as a Doctor of Optometry in 1982. He received his Fellowship to COVD in 1986.

Prior to graduation, he helped establish mobile clinics in rural Honduras, and upon his graduation, he was given direct appointment as a lieutenant in the United States Navy Medical Service Corps. He was stationed at Balboa Naval Hospital, San Diego, where he directed the Vision Therapy Clinic.

He currently serves on the COVD International Examination and Certification Board. He is an adjunct clinical professor at the Southern California College of Optometry, Illinois College of Optometry, Western University School of Health Sciences: College of Optometry, and the International College of Optometry in Madrid Spain. He worked with the United States Volleyball teams for 10 years and provides sports vision training with key players on the San Diego Padres baseball team.

In 1992 Dr. Hillier helped develop the Vision Rehabilitation Clinic at the San Diego Rehabilitation Institute at Alvarado Hospital. He lectures in Spain, England, Mexico and Canada on topics related to vision and vestibular function in children and adults. He developed the Multi-Matrix an activity that nurtures physiological, perceptual and cognitive development.

He has been honored by the American Optometric Association as Sports Optometrist Of The Year, and by the College of Optometrists in Vision Development by receiving the Getman Award, its highest award for clinical excellence.

The Robert Wold Southern California Behavioral Vision Seminar will feature an outstanding program by **Carl Hillier, O.D., FCOVD** The meeting will be held at the Bahia Resort Hotel San Diego (Mission Bay) on Sunday and Monday, March 12-13, 2017. Twelve hours of continuing education credits are offered.

Please plan to join us for this exciting meeting!
